About

I enjoy learning, keeping up to date and practicing with new technologies, and I am proud to highlight my ability to transmit this knowledge to others in a clear and effective way. This vocation to help and share my knowledge has led me to be the leader of a development team specialized in Angular, where I contribute to the joint growth and success.

Experience

Nenes/Notimation `Remote`   2022 - Actually
Angular Developer → Lead Angular Developer

Lead an Angular development team, management of projects and creation of front-end applications utilizing the latests version of Angular, Material, PrimeNg, and Bootstrap. Successfully started the startup and execution of a innovative astro project dedicated to improving the company's documentation practices.

Momento Mate `Remote`   2023 - 2023
Web Developer

Freelance project involved the complete development of a custom website for a podcast/streaming group, utilizing Astro for performance and SEO optimization. Took charge of content management and ongoing maintenance to ensure optimal functionality and user experience.

Spixel Prints   2020 - 2021
Entrepreneur

Entrepreneurship with strong emphasis on management, expense control, sales optimization and network administration. Outstanding in maintaining a commitment to customer satisfaction and product quality.

Education

Universidad Nacional de Córdoba (UNC)   2019 - Actually
Lic. Cs. Económicas

Instituto Nacional de Tecnología Industrial (INTI)   2020 - 2021
Full stack web developer

Instituto Salesiano Pio X   2012 - 2017
Bachiller en Economía y Administración de empresas

Skills

Angular   Typescript   Astro   Tailwind   HTML   CSS   Bootstraap   NodeJs

NestJs   Material   Springboot   Java   Rust   SQL

Projects

USpiri.com   Angular   Astro   Tailwind   SSR   Typescript   MDX

Tri-web project, featuring three interconected projects. The portfolio, developed using angular 17 with Tailwind and Server-Side Rendering (SSR), dynamically loading the latest blog posts and personal information. The blog, powered by Astro, repository for my programming articles, offering a source of knowledge. Last, the CV, providing a printable PDF version, housing information embedded in the portfolio.

Devly CLI   Rust

Devly CLI is an ongoing Rust-based project that assists in development process, providing valuable support for the implementation of Conventional Commits standards. Currently I use this application daily.

Todo CLI   Rust

An efficient command-line program crafted in Rust, dedicated to local task management.

Sticky Notes Angular Angular SDK Local Storage

Sticky Notes represents one of my initial projects developed using Angular, offering a user-friendly notes management system that facilitates organization through tables and boards.
